All the answers you need

What is Toptracer?

Toptracer provides the most advanced ball-tracking technology in golf. It uses the same technology that tracks and displays ball flight in real-time during the television broadcasts of tournaments on the PGA and LPGA Tours. It tracks ball speed, accuracy and distance of every shot, allowing there to be modes and games to suit all ages and skill level. With 9 game play modes to choose from players can pick whether to play for fun or for practice.

How does the technology work?

Toptracer shows the flight path of golf balls with valuable shot data in real-time tracking. Each golf ball hit on the range is tracked by custom-built sensors that provide real-time shot analytics, like ball speed, apex, curve, carry and more.

Do you have to pay for the Toptracer app?

The Toptracer app is free. It will link your personal profile to your entire shot history, including specific club performance details as well as how you rank against other players on leaderboards.

What about if I have never played golf before?
